

# Volunteer Orientation

Spectrum Health Hospice is offering volunteer orientations for individuals who are interested in providing compassionate support for patients nearing the end of life.

Volunteer opportunities are available for those who can offer respite care for a caregiver, friendly visits, document a patient's life story, singers, instrumentalists, visiting therapy pets and for licensed cosmetologists to support patients receiving hospice care in their homes or at long term care facilities. If you have a caring spirit and some time to give – we can use your help to help others! Average time commitment is one hour per week after orientation is completed.

**Please contact us for additional information at:**
